Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-6 and 8-11 are finally rejected under 35 U.S.C. 103(a) as being unpatentable over Carr in view of Ulevich and Hu.

Carr shows the claimed invention except for the use of a base with the same shape as the socket, i.e. hex shaped and making the device of metal. Ulevich suggests that an insert can have its base portion shaped to fit the interior of the socket to provide a better fit in contacting the interior sides. It would therefore be obvious to one skilled in the art at the time the invention was made to modify Carr by using a base with the same shape as the interior of the socket because Ulevich suggests the use of such an insert with a base of that shape.

Further, Hu suggests that an insert can be made of metal and still be used to hold a fastener. It would therefore be obvious to one skilled in the art at the time the invention was made to modify Carr by making the device from metal because Hu suggests that a fastener holder can be made of metal and still provide a holding force.

Art Unit: 3723

3. Claims 7 and 12 are finally rejected under 35 U.S.C. 103(a) as being unpatentable over Carr in view of Ulevich and Hu as applied to claims 1-6 and 8-11 above, and further in view of Paul.

Carr, as modified by Ulevich and Hu above, shows the claimed invention except for the shape of the engagement surface of each finger being concave. Paul suggests that an insert can have both a base from which extend fingers that have a concave engagement surface. It would therefore be obvious to one skilled in the art at the time the invention was made to modify Carr by making the engagement surfaces of each finger concave because Paul suggests the use of such a shape in a socket insert.

Response to Arguments

4. Applicant's arguments with respect to claims 1-1 have been considered but are moot in view of the new ground(s) of rejection.

_____ The newly added limitation of the type of material of construction of the device is _____
clearly suggested by Hu, a holder similar to that of Carr.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 3723

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
